

Our professional grade aeration system. A **lifetime warranty** on the outdoor enclosure is standard. This system allows for up to six diffusers. Oversized exhaust fans to vent heated compressor air is just one of the features that sets this product apart from the competition.

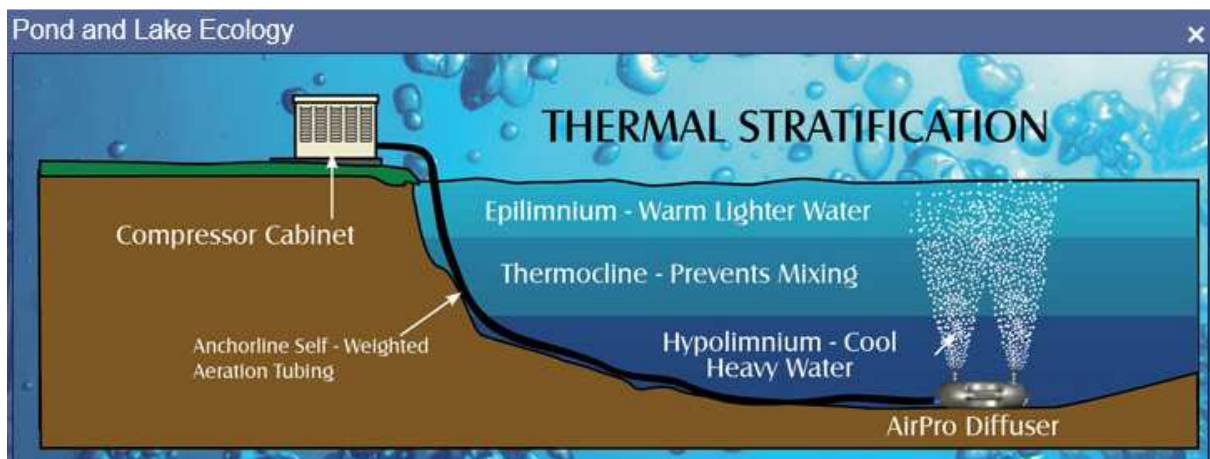

What are the benefits of this Aeration System?

- Increases water clarity
- Eliminates foul pond odors
- Prevents fish kills by increasing oxygen levels
- Eliminates thermal stratification
- Reduces nutrient and associated algae levels
- Reduces mosquito hatches

Why buy this system?

- Best warranties in the industry
- Lower cost than competition
- Enclosure engineered to remove heated air at a faster rate than competitive angled lid designs
- Quietest equipment on the market
- Industry's finest customer support

Lake Bed Aerator

Features

- Professional grade
- Available for use with up to six diffusers
- Powder coated aluminum enclosure features a LIFETIME WARRANTY against corrosion in fresh water applications
- 1/3 HP WOB-L™ piston compressors are oil free and feature a 2 - year warranty
- Diffusers are self-cleaning and feature a 5 - year warranty
- Diffuser bases are self weighted at the factory - no need to add pea gravel or weight
- AnchorLine self-weighted air tubing features a 15 - year warranty
- Quiet operation - Compressors are inaudible at 7 m
- Timer included standard for operation of systems
- Diffusers release air only centimeters from the lake bottom preventing disruption of settled organics.
- Oversized 300 CFM cooling fans have sealed bearings
- GFCI protection for 120 volt systems
- Equipment base comes standard with every unit, eliminating the need for a concrete base
- The oil free WOB-L piston compressors are easily and economically maintained
